RE: Site Inspection, Bonneville Quarries, Inc, Green Beetle Quarry, S/003/017, Box Elder County, Utah

Date of Inspection: September 16, 2003
Time of Inspection: 5:00pm.
Conditions: Partly cloudy
Participants: Lynn Kunzler, DOGM

Purpose of Inspection: To document site conditions while in the area

Observations:

Reclamation has not yet been completed on the first pit area; however, negotiations are underway to transfer this pit to another operator. The second pit also has not had reclamation completed, although most of this pit has been backfilled. The third pit area has been active in recent weeks. Of concern are two new road segments that apparently have been created as shortcuts for equipment to get to the top of the hill. These segments were surveyed with the GPS and will need to be added to the permit area.

Several photos were taken to document site conditions.

Conclusions and Recommendations:

The permit will need to be amended to include the new road segments that were observed during this inspection. Reclamation of the first two pits, or a partial transfer of these areas to another operator needs to be completed before the next field season, or the Division should require this operation to be permitted as a large mining operation.
